

VV&A for LVC An Industry View

John Carlile
Director, Experimentation

25 January 2011

Issues

- M&S and VV&A in the past
- Government VV&A issues vs Industry issues
- DIY
- Integration
 - Data Bases
 - Comm
 - Pedigrees
 - “Environment” and “Standards”
 - Tactics and CONOPS
 - OITL for decisions
 - Timing, data overload, comm, fog of war, synergy, visualization

What does Industry Want?

1. Common knowledge of “adequacy” criteria for accreditation
2. Government furnished threat data and models
3. Common tools or models---sometimes
4. If Government & multi-company:
 - Clear M&S plans
 - Access to the master sim environment and documentation
 - Confidence that everyone is bringing good models, assumptions, and data
 - Government accreditation
5. Protection for our intellectual property
