

2019 Test Instrumentation Workshop

Bacon.

**Admit it. For a second there,
all your problems went away.**

But...Test Instrumentation isn't like that...so...Instrumentation and Data Processing folks...

What's Your Problem?

The 2019 ITEA Test Instrumentation Workshop would like to know. Typically we start Workshop Planning with a "Call-for-Papers," here at the 2019 ITEA TIW we're a bit different...

This is the **ITEA TIW "Call-for-Problems"**; This is Your Workshop, intended to answer your problems. What are the issues, topics, concerns, and problems you would like to see addressed at the 2019 Test Instrumentation Workshop? Are you doing something stimulating you think others would find interesting? What problems are stumping you? What processes do you think we need to do better? Talk to us about your dirty laundry!

The 2019 TIW Committee is looking for ideas that we can pursue as potential topics for the

next ITEA TIW workshop. We need Session Chairs to pursue these topics to find subject matter experts and speakers who can potentially present some new approaches or solutions to these problems. This is what makes this a "Workshop" and why the ITEA TIW is a bit different; it can only be as good as You make it!

Let's Talk Instrumentation, Telemetry, data processing, sensors, signal conditioning, data networks, test management, reporting, cyber, ...No idea too far out, no topic too weird—if it's an issue we can try to address it.

Let's get some ideas moving and let the TIW Technical Staff work some magic.

Send your ideas and thoughts to **TIW@ITEA.org**.

PS. Forget the Bacon, it's not good for you anyway...knowledge, however, always is.
