Cybersecurity Workshop

Securing the Future:
Navigating the Evolving Threat Landscape

August 29–31, 2023 | Virginia Beach, VA

WORKSHOP HIGHLIGHTS

- 7 Pre-Workshop Tutorials: Earn Continuing Professional Education Credits (CPEs)
- Keynote Speakers & Panel Discussions
- 8 Public Release and Limited Distribution Technical Sessions addressing Cyber Resilience, Spectrum Warfare, Test Automation/AI, and much more!
- Exhibits & Networking Events
- STEAMhack™ Chain Reaction Challenge

SPONSORS NEEDED

STEAMhack™ Chain Reaction Challenge — Tuesday, August 29th

The STEAMhack™ Chain Reaction Challenge is a speed-building event where teams of 3–6 high school students receive a kit of materials and about 3 hours to build the most impressive chain reaction-style machine.

This year, students will have to "Catch a Meteor" by building machines to launch and catch a meteor, and integrate the reason for catching a meteor into the story described by the team prior to the triggering of the chain reaction. An Awards ceremony will take place directly after the competition.

Support the Future T&E Workforce! Contact Lena@itea.org to become a sponsor.

NOT TO BE MISSED!

A Cyber Attack Experience

Live cyber attacks against emulated DoD-representative systems (sponsored by DoD's Cyber Red Zone cyber training activity)

Audience members will get a bird's eye view of actual DoD penetration testers conducting cyber attacks accompanied by explanation of attack goals and methods.
